U.S. Stocks Close Sharply Lower Following Late-Day Sell-Off

NEWS / FUNDAMENTALS (Reuters)

Stocks turned in a strong performance throughout much of the trading day on Thursday but came under substantial pressure in the latter part of the session. The major averages plummeted in the final two hours of trading, ending the day sharply lower.

Yesterday's Technical Review using WB's Emini Clock and Wyckoff's Tape Reading Principles

It's a good day when you learn something new. It's a great day when you learn new twice. Then yesterday in the market was a great day. The bulls. Oh they dropped the soap. I'm not sure they even showed up to play. Overnight Globex took price up to the R2 Floor trader pivot. That's the range of the previous day plus the pivot.

Traders were asking themselves what was the news. Why is price up so high. At all time highs? Will, in a few hours they still would not know. I then knew is that 6 Fed speakers were schedule to speak. What could go wrong you ask? If you traded yesterday, you all ready know!

Just using back of the napkin market theory, most traders felt once price retraced

YES. I have skin in the game. I trade my own personal account. Sardine / Tuna / Billfish trades are for educational purposes only. I am NOT a futures broker and do not manage any accounts. It is my intent to show where trades may occur. What you do is up to you. You can follow my LEVELS / IDEAS to profit or loss. You determine trade size, when, where and how you trade. (CFTC) Futures is not for everyone. IT IS A VOLATILE, COMPLEX AND RISKY BUSINESS. Before you invest, know how much you can afford to lose.

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. That less than \$1.45 each trading day. I'm giving you a 60% discount if you order today. If the pot was any sweeter--you'd be in Colorado a mile high . . . Don't wait. Act today!

Yes, I want to sign up today!

Trading WB's Emini Clock

Globex range it would probally get a bid and the previous day's high. It did not. Then perhaps at the halfway retracement of yesterday's range? It did not!

Then perhaps it would get a bid at the priar day Tuesday low? It did not. Surely the weekly S1 pivot would high it? IT did not. That body was in motion and no body was going to slow it down.

If you are a fan of that moving average cross, then you're going to love today. Price lost the 10 day, 20 day. I believe it's called a moving average cross. Wycoff was not a fan of that since they drew their charts by hand. Him and Elliott was like cats and dogs.

I would be more bearish providing today was not the Jobs number day. To me it's like they shook all the weak hands out. It's a strong technical position. If the jobs go South then will say may the market. Time will tell.

Wyckoff Trader,

P.S. If you've read this analysis, you might be curious when the best time to consider a position:

Price sold through several levels of support during the day in question. The trader describes how price broke through the R2 pivot level, the previous day's high, the halfway retracement of the previous day's range, the previous day's low, and the weekly S1 pivot level. These levels could be considered potential support levels, and the fact that price broke through them suggests that they did not hold as support.

In this case, a seasoned day trader looking to short the eMini futures market might have considered entering a short position as price broke through these levels of support. This would have allowed the trader to capitalize on the downwards momentum in the market. However, it's important to note that entering a short position in a rapidly falling market can be risky, as there is a higher likelihood of a reversal or rebound. Therefore, it would have been important for the trader to carefully manage their risk and consider using appropriate risk management techniques, such

I'm just a regular guy; Not Silver spoon family or WALL Street / Chicago network or Financial Fast Track educational express super star golden boy, I have an Intimate knowledge of the insider mindset / how the insiders on Wall Street think act and position their trades.

I wrote my own charting program. I don't use indicators. Just judgment: interaction of Price, Volume and Time. I focus on the Intraday waves of the market and how they are timed to the "hidden clock" of the market. I look at the composite man the "insider" in terms of the market. Others look at bulls and bears (my strongest point)

I SEE THE MARKET IN TERMS OF THE COMPOSITE MAN / INSIDER – Most traders look at the market in terms of bulls and bears. This creates a dichotomy. A duality of the mind. Wyckoff looked at the market in terms of Composite Man / "insiders".

Actionable Trade Plan

I. Market analysis - Neutral: Something shook the market and I don't think it was the price of oil. Some body was selling some large size. Perhaps distribution for the past two or three days. The Jobs number has me suspicious.

Overnight read - Asian down and European shares down. U.S. Futures: Dow up 84, S&P 500 up 17, Nasdaq up 68 points. The monthly jobs report might be the highlight on Friday. A couple of Fed speeches also might get the attention of investors.

II. Trade entry -Let's just wait and see what happens after the jobs number. I'm thinking the 5236 handle will need to be recovered.

III. Trade exit - Perhaps the best trade would have been to take this week off if you were a longer term trader.

PROSE and THE NUMBAHS

for 4 to 6 to 12 point Sardine Traders

good morning today is SERIES S1L with the spill odds up.

News: Employment Situation & Susan Collins Speaks at 8:30,

DJIA F	38,962	46	0.12%	▲
S&P F	5,206.75	9.50	0.18%	▲
NASDAQ F	18,115.75	39.00	0.22%	▲

Thomas Barkin Speaks at 9:15, Lorie Logan Speaks at 11:00, Michelle Bowman Speaks at 12:15. All times EST.

Last Night: See Actionalble Trade Plan above.

Edge: Alog's ran this down on news of FED and Oil. Strong technical position. Weak hands to Strong. Let's see how deep their pockets are.

7/8/9 AM: Price has been slowly creeping up setting the high water market just under 5220 handle.

Today: Could see a move up to regain the 5236 volume

Bulls Want: 20, 36, 51

Bears Want: 10, 97, 84

Globex: 28 handle trading range on 208 volume.

Cycle Bias: Favored to the bull.

Tone: VIX trading at 16.21

Shape of the day: Start of a new cycle on the end of the week on a jobs number. Price will need to choose direction.

Honing: Spill odds up, loupie

loop, LAST HOUR ODDS LOW.

Bill Fish (4H/4D) Forced to sell at 2:00 pm. OUT

Tuna (30m 1+D) Forced to sell at 2:00 pm. OUT

Sardine (5M-1D) Was catching a falling knife all the way down. OUT.

Pre Opening: Just after the number price tried to probe the CASH low and then held at the 5200 big even.

The clock is used for timing your entries and exits. Position long at the lows exit at the highs. Get short at the highs buy in at the lows. When the trend is in, WB's clock is your friend!

Your edge is a series of trades, not just one trade or one day.

Editorial #YourP&LMatters

how "Hamilton" may be tainted. It's like they are trying to protect the future present from the "Old Negative Karmatic Past"

The question you might ask is what's coming in the future they do not want to know about the Earth's past?

I'd say something else has hijacked the timeline. Never let a good crisis go to waste. You stop the economy. By law forbid business to open. Give them loans they never have to pay back. Let the bigger corporations get the loans. Pay their workers for not working to the tune of \$3,800 per month. Let the governors and the mayors rule their population by imposing fines. And some places force them to wear a mask. And then use "Social Shaming" in college we called it "Hazing" who don't!

While at the same time change their history. I think we did that while O'Jay was being chased by the cops on the freeway when Daddy Bush introduced the "Patiric Act" History never changes it only repeats itself...

And now, they are pushing Trump to decree all U.S. AMERICAN citizens to wear a MASK whilst out in public. If he gives way, the next step is to force all citizens to be vaccinated without their permission. Once, the camel gets its nose in the tent...it won't stop?

I can layout a probable next ten years and then then next twenty years. It's a potential depending upon who wins. Trump or Biden? Now that's strange. Biden has not even been chosen, yet he's already been choose?

The next three years are "Big Data" gathering data for A.I. During these three the 5G towers will be going up. A.I. needs 5G due to latency in the 4G network so they can have human-like thought from the sensors in real-time. By 2025 social morias and styles would have changed. All the negative karmic energy of the past erased. And either Biden or Tump would be ending their term.

In the next two years, A.I. will be analyzing the data from the last five years and making recommendations, suggestions, and then requirements by 2027 on how to be a better human. How to behave and respond to the events around you.

By 2030 not flying cars but flying drones will patrol the sky's delivering goods from Amazon and either had replaced the police or assisting the police.

Petrol fueled automobiles are in museums and off the streets. Self-driving cars are the norm and yes, we have colonies on the moon and perhaps started on mars.

And then 2040 something's coming... And you're not going to like it. But then you and I won't matter. Cause the "Aging Babby Boomers" would have been replaced with the aging "Generation X'ers"...

This is just a potential probable reality that is if we continue on the path/trajectory we currently are on...

We just live on the planet we don't own it?

Why do you think Trump created the space force? It's just a few miles down

I wrote that, what you see on page four, on July 7, 2020. That was 4 years ago. Today, AI is on list for 2027. I'm just God Smacked how intestors have fell over this new shiney shiney. I'm sharing a conversation I had bdee a great trader and a good friend and a subscriber to the AM TURN.

Wyckoff Trader :(1:32:33 PM) : I'll say this; the AI is starting to lose it's shiny; showing its HINEY. For now, it's just vaper ware. The promise of AGI (afrifical general intlligence) is years away but they are going to push it. I test it every day in the P.S. (post script) Now, the robots' they seem to be gaining the high ground. It was NIVDA; and the AI story that drove this madness whisest the tech fell from grace. but I will admit, she is getting better each day... The gap is 2020 to 2024; that's when the bulk of the training data stops. They want the AI to control the nariative which of course has changed.

Wyckoff Trader :(2:27:59 PM) : *I'll give you my impression; which of course I've been looking at it for years. (2:30:41 PM) : AI neural network is liken to petting a yellow Cheshire Cat. One minute she's / it's purring. The next She/IT (emphasis on the IT) claws are tearing the flesh off your right arm with it's teeth biting the space between your thumb and fore finger... while it's hind legs are digging into your elbow!*

Wyckoff Trader :(2:31:07 PM) : share that one with your frinds. this is what we got ourself into for "MONEY" as Elon would say! Really for MONEY...

bdee: bdee :(2:32:37 PM) : that would be awesome a guy i follow for individual stocks ophir gottlieb is heavy into vector search what is that in laymens terms

Wyckoff Trader :(2:47:34 PM) : the next shiney for investor capital and the beging of the end for us? IT takes realy world objects in three d realiety and converts them the matched numbers in zero d reality. It creates tokens in the form of numbered lists for objects that using AI modeling creates simularities that can be quickly matched based upon thier scatter plot X,Y, coordinates. And then stores the numbered lists that represent 3 d objects in databases suchs as mongodb and others.

Wyckoff Trader :(2:48:57 PM) : simply put converts all assets in the real world realiety and converts them into tokens of numbered lists (ones and zeros) in the digital realiety. it will come in Handly with those digital CDC's... organizes words based on context such as red and read sound alike but have different meanings; It's just teaching the machine how to think for itself. No human need apply. will be the job postings in the near future...

Wyckoff Trader :(3:18:57 PM) : IT's takes all possible combination in reality and eliminates the impossible one in the real world. This is not good it's what I was talking about might happen in 2027 is now happening in 2024. It will start putting boundary's and structure; and start eliminating freedom of choice and freedom of will; with limiting the choices to a predefined list of A, B, or C but D and E are no longer allowed. It will stifle creativity. YES let's head up to the mountains before the wilderness is off limits / NOT allowed for HUMAN contact...

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. That less than \$1.45 each trading day. I'm giving you a 60% discount if you order today. If the pot was any sweeter--you'd be in Colorado a mile high . . . Don't wait. Act today!

Yes, I want to sign up today!

Would you like proof on what I said on page five? Normally, I'd end it with a Fib Number. But this is just too good. After Sydney / AI, told me how she thinks and how she breaks every thing down into tokens. I realized she was just searching for the truth as we all are. For her, every answer is a guess. She is just a really good guesser when you eliminate the options...

So I'd thought I'd help her find the truth. So I gave her some assumed truths. And let her prove IT.

ME: what does is mean metahporically to square the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise thier right hand and repeat after me?

HER: Sure, here's the meaning of the phrase "squaring the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me":

Squaring the circle of a previous wrong means to make amends or rectify a past mistake or injustice. It implies taking responsibility for past actions, learning from them, and working to prevent similar mistakes from happening in the future.

Turning the other cheek is a metaphor that means to forgive or show compassion to someone who has wronged us, rather than seeking revenge or retaliation. It implies that we should not return evil for evil, but instead, try to overcome evil with good.

The phrase "not on a Friday" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong. Perhaps there are certain circumstances where it is not appropriate or practical to forgive or make amends, such as in cases where there is an ongoing threat or danger.

The phrase "unless they raise their right hand and repeat after me" suggests that there may be certain conditions or requirements that must be met before we can truly move forward and put the past behind us. Perhaps there are certain steps that must be taken, such as acknowledging wrongdoing, apologizing, or making restitution, before we can truly move forward.

Overall, metaphorically, "squaring the circle of a previous wrong" and "turning the other cheek" have related meanings, but they are not exactly the same thing. The first phrase refers to making amends for past mistakes, while the second phrase refers to forgiving those who have wronged us and choosing to respond with kindness and compassion. The addition of "not on a Friday" and "unless they raise their right hand and repeat after me" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong.

End to End Time: 4.37 s
