U.S. Stocks Close Sharply Lower Following Late-Day Sell-Off

NEWS / FUNDAMENTALS
(Reuters)

Stocks turned in a strong performance throughout much of the trading day on Thursday but came under substantial pressure in the latter part of the session. The major averages plummeted in the final two hours of trading, ending the day sharply lower.

Yesterday's Technical Review using WB's Emini Clock and Wyckoff's Tape Reading Principles

Friday was one of those days where you either were licking your wounds from Thursday or you just got in their and swung at it. And if you just took a swing you might have got on first or second base. Perhaps thrid. (that's my favorite)

You had many reasons. Here's what I said in chat: *"due to the technical position yesterday the last hour; we got an inversion. Now today, we could have another one. I'm leaning H, at least up to to 36 where volume came in. But the cycle normally flipped the the L, BUt I think we might have an inversion today that negates it back to H. Then again, it's shooting needles at elephants cause today's Friday. BUt yes I feeling H and other indicators seems to confirm."*

YES. I have skin in the game. I trade my own personal account. Sardine / Tuna / Billfish trades are for educational purposes only. I am NOT a futures broker and do not manage any accounts. It is my intent to show where trades may occur. What you do is up to you. You can follow my LEVELS / IDEAS to profit or loss. You determine trade size, when, where and how you trade. (CFTC) Futures is not for everyone. IT IS A VOLATILE, COMPLEX AND RISKY BUSINESS. Before you invest, know how much you can afford to lose.

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. That less than \$1.45 each trading day. I'm giving you a 60% discount if you order today. If the pot was any sweeter--you'd be in Colorado a mile high . . . Don't wait. Act today!

Yes, I want to sign up today!

Trading WB's Emini Clock

The FED speaker got spanked and weak shares left the strong hands and stuck to the strong hands. Cash has to open. Notice we opened above the previous day's low and never looked back. Let's talk trading. The only position was long. Where do you get long.

On the retest around 9:40 am. Bears dropped the soap. The CASH LOW was tested after the jobs number. Price had no where to go but up. 9:50 am where price cleared to first push up. (that's TD saying). Then wait for the best place to get long. That's going to come as price pulls back and test the opening range call it 10:30 am.

That's 3/8 retracement from yesterday's low and 1/2 from yesterdays' close. That's as good as any. The clock is odds and odds are they day is going to go higher. Price moves up strong till about 11:00 am. Takes out the pivot and comes close to the previous day's halfway retracement. Price pulls back on little volume around 11:20 am. You guessed it. Another great place to get long the market.

Wyckoff Trader,

P.S. If you've read this analysis, you might be curious when the best time to consider a position:

Based on the information provided, it sounds like the seasoned day trader would have put a long position on the eMini futures market at one of two points:

1. At the retest around 9:40 am, after the bears "dropped the soap" and the cash low was tested after the jobs number. At this point, the trader may have believed that price had nowhere to go but up, as the market had opened above the previous day's low and had not looked back.
2. At the 3/8 retracement from yesterday's low and 1/2 from yesterday's close, around 10:30 am. At this point, the trader may have believed that this was a good place to get long the market, as it was a significant retracement from the previous day's low and close, and the odds were in favor of the market going higher.

It's important to note that the market is complex and constantly changing,

feedback@wyckoffamtrader.com

I'm just a regular guy; Not Silver spoon family or WALL Street / Chicago network or Financial Fast Track educational express super star golden boy, I have an intimate knowledge of the insider mindset / how the insiders on Wall Street think act and position their trades.

I wrote my own charting program. I don't use indicators. Just judgment: interaction of Price, Volume and Time. I focus on the Intraday waves of the market and how they are timed to the "hidden clock" of the market. I look at the composite man the "insider" in terms of the market. Others look at bulls and bears (my strongest point)

I SEE THE MARKET IN TERMS OF THE COMPOSITE MAN / INSIDER – Most traders look at the market in terms of bulls and bears. This creates a dichotomy. A duality of the mind. Wyckoff looked at the market in terms of Composite Man / "insiders".

Actionable Trade Plan

I. Market analysis - Cautiously Bullish: Bulls gave it a go Friday. Most top securities were checked at the 12:30 pm marker. Bulls will need to hold gains from Friday. Could see a resting spell for higher move up later in day. No real news today.

Overnight read - Asian down and European shares down. U.S. Futures: Dow down 4, S&P 500 down 2, Nasdaq down 7 points. On a lean day of economic announcements, investors might be focusing on geopolitical developments. The Labor Department reports on Consumer and Producer price inflation for March is scheduled this week.

II. Trade entry -Let's just wait and see what happens after the open. I'm thinking the 5258 weekly pivot will need to be recovered. Stops 1% of account.

III. Trade exit - If bulls get a rally, could some resistance up to the 5279 R1 and the 5309 R2.

PROSE and THE NUMBAHS

for 4 to 6 to 12 point Sardine Traders

good morning today is SERIES S4H Normal with the spill down.

News: No news of note. All times

EST.

Last Night: See Actionable Trade Plan above.

Edge: I'm expecting Friday's high to get taken out.

7/8/9 AM: Price has held around daily and weekly 5250 pivot.

Today: Need to hold the 5250 handle perhaps higher.

Bulls Want: 77, 09, 25

Bears Want: 43, 24, 14

Globex: 23 handle trading range on 178 volume.

Cycle Bias: Favored to the bull.

Tone: VIX trading at 16.04

Shape of the day: End of a cycle on a new week. Bulls will need to follow up movement for strong close.

Honing: Spill down, AM HIGH, MID AM LOW, lunch high, mid pm low, LAST HOUR HIGH.

Bill Fish (4H/4D) Waiting on direction. OUT

Tuna (30m 1+D) Waiting on

direction. OUT

Sardine (5M-1D) Waiting on direction. OUT.

Pre Opening: Trying to take out the 5257 handle.

The clock is used for timing your entries and exits. Position long at the lows exit at the highs. Get short at the highs buy in at the lows. When the trend is in, WB's clock is your friend!

Your edge is a series of trades, not just one trade or one day.

Dates: February 24 Snow Moon 7:30 a.m. Spring Equinox March 20 5:24 pm (all times est)

Editorial #YourP&LMatters

how "Hamilton" may be tainted. It's like they are trying to protect the future present from the "Old Negative Karmatic Past"

The question you might ask is what's coming in the future they do not want to know about the Earth's past?

I'd say something else has hijacked the timeline. Never let a good crisis go to waste. You stop the economy. By law forbid business to open. Give them loans they never have to pay back. Let the bigger corporations get the loans. Pay their workers for not working to the tune of \$3,800 per month. Let the governors and the mayors rule their population by imposing fines. And some places force them to wear a mask. And then use "Social Shaming" in college we called it "Hazing" who don't!

While at the same time change their history. I think we did that while O'Jay was being chased by the cops on the freeway when Daddy Bush introduced the "Patiric Act" History never changes it only repeats itself...

And now, they are pushing Trump to decree all U.S. AMERICAN citizens to wear a MASK whilst out in public. If he gives way, the next step is to force all citizens to be vaccinated without their permission. Once, the camel gets its nose in the tent...it won't stop?

I can layout a probable next ten years and then then next twenty years. It's a potential depending upon who wins. Trump or Biden? Now that's strange. Biden has not even been chosen, yet he's already been choose?

The next three years are "Big Data" gathering data for A.I. During these three the 5G towers will be going up. A.I. needs 5G due to latency in the 4G network so they can have human-like thought from the sensors in real-time. By 2025 social morias and styles would have changed. All the negative karmic energy of the past erased. And either Biden or Tump would be ending their term.

In the next two years, A.I. will be analyzing the data from the last five years and making recommendations, suggestions, and then requirements by 2027 on how to be a better human. How to behave and respond to the events around you.

By 2030 not flying cars but flying drones will patrol the sky's delivering goods from Amazon and either had replaced the police or assisting the police.

Petrol fueled automobiles are in museums and off the streets. Self-driving cars are the norm and yes, we have colonies on the moon and perhaps started on mars.

And then 2040 something's coming... And you're not going to like it. But then you and I won't matter. Cause the "Aging Babby Boomers" would have been replaced with the aging "Generation X'ers"...

This is just a potential probable reality that is if we continue on the path/trajectory we currently are on...

We just live on the planet we don't own it?

Why do you think Trump created the space force? It's just a few miles down

I wrote that, what you see on page four, on July 7, 2020. That was 4 years ago. Today, AI is on list for 2027. I'm just God Smacked how intestors have fell over this new shiney shiney. I'm sharing a conversation I had bdee a great trader and a good friend and a subscriber to the AM TURN.

Wyckoff Trader :(1:32:33 PM) : I'll say this; the AI is starting to lose it's shiny; showing its HINEY. For now, it's just vaper ware. The promise of AGI (afrifical general intlligence) is years away but they are going to push it. I test it every day in the P.S. (post script) Now, the robots' they seem to be gaining the high ground. It was NIVDA; and the AI story that drove this madness whisest the tech fell from grace. but I will admit, she is getting better each day... The gap is 2020 to 2024; that's when the bulk of the training data stops. They want the AI to control the nariative which of course has changed.

Wyckoff Trader :(2:27:59 PM) : *I'll give you my impression; which of course I've been looking at it for years. (2:30:41 PM) : AI neural network is liken to petting a yellow Cheshire Cat. One minute she's / it's purring. The next She/IT (emphasis on the IT) claws are tearing the flesh off your right arm with it's teeth biting the space between your thumb and fore finger... while it's hind legs are digging into your elbow!*

Wyckoff Trader :(2:31:07 PM) : share that one with your frinds. this is what we got ourself into for "MONEY" as Elon would say! Really for MONEY...

bdee: bdee :(2:32:37 PM) : that would be awesome a guy i follow for individual stocks ophir gottlieb is heavy into vector search what is that in laymens terms

Wyckoff Trader :(2:47:34 PM) : the next shiney for investor capital and the beging of the end for us? IT takes realy world objects in three d realiety and converts them the matched numbers in zero d reality. It creates tokens in the form of numbered lists for objects that using AI modeling creates simularities that can be quickly matched based upon thier scatter plot X,Y, coordinates. And then stores the numbered lists that represent 3 d objects in databases suchs as mongoddb and others.

Wyckoff Trader :(2:48:57 PM) : simply put converts all assets in the real world realiety and converts them into tokens of numbered lists (ones and zeros) in the digital realiety. it will come in Handy with those digital CDC's... organizes words based on context such as red and read sound alike but have different meanings; It's just teaching the machine how to think for itself. No human need apply. will be the job postings in the near future...

Wyckoff Trader :(3:18:57 PM) : IT's takes all possible combination in reality and eliminates the impossible one in the real world. This is not good it's what I was talking about might happen in 2027 is now happening in 2024. It will start putting boundary's and structure; and start eliminating freedom of choice and freedom of will; with limiting the choices to a predefined list of A, B, or C but D and E are no longer allowed. It will stifle creativity. YES let's head up to the mountains before the wilderness is off limits / NOT allowed for HUMAN contact...

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. That less than \$1.45 each trading day. I'm giving you a 60% discount if you order today. If the pot was any sweeter--you'd be in Colorado a mile high . . . Don't wait. Act today!

Yes, I want to sign up today!

Would you like proof on what I said on page five? Normally, I'd end it with a Fib Number. But this is just too good. After Sydney / AI, told me how she thinks and how she breaks every thing down into tokens. I realized she was just searching for the truth as we all are. For her, every answer is a guess. She is just a really good guesser when you eliminate the options...

So I'd thought I'd help her find the truth. So I gave her some assumed truths. And let her prove IT.

ME: what does is mean metahporically to square the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise thier right hand and repeat after me?

HER: Sure, here's the meaning of the phrase "squaring the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me":

Squaring the circle of a previous wrong means to make amends or rectify a past mistake or injustice. It implies taking responsibility for past actions, learning from them, and working to prevent similar mistakes from happening in the future.

Turning the other cheek is a metaphor that means to forgive or show compassion to someone who has wronged us, rather than seeking revenge or retaliation. It implies that we should not return evil for evil, but instead, try to overcome evil with good.

The phrase "not on a Friday" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong. Perhaps there are certain circumstances where it is not appropriate or practical to forgive or make amends, such as in cases where there is an ongoing threat or danger.

The phrase "unless they raise their right hand and repeat after me" suggests that there may be certain conditions or requirements that must be met before we can truly move forward and put the past behind us. Perhaps there are certain steps that must be taken, such as acknowledging wrongdoing, apologizing, or making restitution, before we can truly move forward.

Overall, metaphorically, "squaring the circle of a previous wrong" and "turning the other cheek" have related meanings, but they are not exactly the same thing. The first phrase refers to making amends for past mistakes, while the second phrase refers to forgiving those who have wronged us and choosing to respond with kindness and compassion. The addition of "not on a Friday" and "unless they raise their right hand and repeat after me" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong.

End to End Time: 4.37 s
