U.S. Stocks Finish Lackluster Session Little Changed

NEWS / FUNDAMENTALS
(Reuters)

Following the substantial volatility seen over the final two sessions of the previous week, stocks turned in a relatively lackluster performance during trading on Monday. The major averages spent the day bouncing back and forth across the unchanged line before eventually closing narrowly mixed.

Yesterday's Technical Review using WB's Emini Clock and Wyckoff's Tape Reading Principles

I'm biased to the bulls side for many reasons. Some just based upon an intuitive feel. Wyckoff was like that. He'd call it intuition. And then he'd back it up as what he called confirmation of the market next behavior. He'd just put the trade on based upon a feel.

If you were like that on the spill down. Congratulations. Earlier in the night about 4:30 am you would have seen price tag the 5236.50 handle. You probably did not see it but you saw it when you got up. Price then rallied up to the 5266.75 handle. Then started to offer back down.

As the opening, price was working off the decline. So when 9:40 am came into view

price was just past the halfway mark. And also above the floor trader pivot. So, put the trade on. Get long. The best you can hope for is the opening print. Too much wood to cut for price to pop all the way back to the Globex high.

You can however get long. Your next turn is AM HIGH. As price showed you an automatic rally, that was the confirmation but you probably just exited at the top around 10:00 am. That's ok got a 8 to 10 handle run. Notice price checks the spill down around 10:10 am and by 10:20 am was showing signs of buoyancy. That's the place to get long!

Why? Price has been in a potential area of minutes for about 40 minutes. Support levels have been raised from 5247, 5250, and 5251 handle. You are looking for the AM TURN HIGH. It's S4H day.

15 minutes later you can not be disappointed. The AM HIGH seals at 10:50 late and strong. Exit your trade cause the market is about to be eclipsed.

Wyckoff Trader,

P.S. If you've read this analysis, you might be curious when the best time to consider a position:

Based on the information provided, it sounds like the seasoned day trader would have put a long position on the eMini futures market at one of two points:

Based on the information provided, a seasoned trader looking to execute a day trade on the eMini futures market would have had an opportunity to put on a long trade at 9:40 am, as price had declined to just past the halfway mark and was above the floor trader pivot. This was the trader's confirmation to enter the trade, and they could have expected an 8 to 10 handle run.

Another opportunity to enter the trade would have presented itself around 10:20 am, as price showed signs of buoyancy after checking the spill down and being in a potential area of accumulation for about 40 minutes. Support levels had been raised, and the trader should have looked for the AM turn

I'm just a regular guy; Not Silver spoon family or WALL Street / Chicago network or Financial Fast Track educational express super star golden boy, I have an intimate knowledge of the insider mindset / how the insiders on Wall Street think act and position their trades.

I wrote my own charting program. I don't use indicators. Just judgment: interaction of Price, Volume and Time. I focus on the Intraday waves of the market and how they are timed to the "hidden clock" of the market. I look at the composite man the "insider" in terms of the market. Others look at bulls and bears (my strongest point)

I SEE THE MARKET IN TERMS OF THE COMPOSITE MAN / INSIDER – Most traders look at the market in terms of bulls and bears. This creates a dichotomy. A duality of the mind. Wyckoff looked at the market in terms of Composite Man / "insiders".

Actionable Trade Plan

I. Market analysis - Billish: It's ground hog day. Sure, same thing different day. Bulls are starting to eat away at that shelf of supply. Last night around 6:35 am price traded down to S1 5245 and got a bid. Recovered the Monthly Pivot 5151, the 3-Day pivot 5153, 20-Day AM 5157, and Weekly Pivot 5158 all within an hour and looking to challenge the 10-Day AM 5269 handle.

Overnight read - Asian down and European shares down. U.S. Futures: Dow up 34, S&P 500 up 9, Nasdaq up 51 points. A lack of major U.S. economic data may lead to another choppy trading session on Early signs from the U.S. Futures Index suggest that Wall Street might open slightly up on Tuesday. The stalled ceasefire talks between Israel and Gaza and other geopolitical situations might be influencing investor sentiments. The inflation data due later this week and a warning about upside risk of inflation are closely watched.

II. Trade entry - Buying weakness 58 down to 51 perhaps to 45 handle. Stops S2 5233 or 1% of account.

III. Trade exit - 1/4 at 69/73 or add if aggressive move stop breakeven. 1/4 at R2 5280 handle. 1/4 at R3 5304. Hold remaining 1/4 till close or bail eariler.

Editorial #YourP&LMatters

how "Hamilton" may be tainted. It's like they are trying to protect the future present from the "Old Negative Karmatic Past"

The question you might ask is what's coming in the future they do not want to know about the Earth's past?

I'd say something else has hijacked the timeline. Never let a good crisis go to waste. You stop the economy. By law forbid business to open. Give them loans they never have to pay back. Let the bigger corporations get the loans. Pay their workers for not working to the tune of \$3,800 per month. Let the governors and the mayors rule their population by imposing fines. And some places force them to wear a mask. And then use "Social Shaming" in college we called it "Hazing" who don't!

While at the same time change their history. I think we did that while O'Jay was being chased by the cops on the freeway when Daddy Bush introduced the "Patiric Act" History never changes it only repeats itself...

And now, they are pushing Trump to decree all U.S. AMERICAN citizens to wear a MASK whilst out in public. If he gives way, the next step is to force all citizens to be vaccinated without their permission. Once, the camel gets its nose in the tent...it won't stop?

I can layout a probable next ten years and then then next twenty years. It's a potential depending upon who wins. Trump or Biden? Now that's strange. Biden has not even been chosen, yet he's already been choose?

The next three years are "Big Data" gathering data for A.I. During these three the 5G towers will be going up. A.I. needs 5G due to latency in the 4G network so they can have human-like thought from the sensors in real-time. By 2025 social morias and styles would have changed. All the negative karmic energy of the past erased. And either Biden or Tump would be ending their term.

In the next two years, A.I. will be analyzing the data from the last five years and making recommendations, suggestions, and then requirements by 2027 on how to be a better human. How to behave and respond to the events around you.

By 2030 not flying cars but flying drones will patrol the sky's delivering goods from Amazon and either had replaced the police or assisting the police.

Petrol fueled automobiles are in museums and off the streets. Self-driving cars are the norm and yes, we have colonies on the moon and perhaps started on mars.

And then 2040 something's coming... And you're not going to like it. But then you and I won't matter. Cause the "Aging Babby Boomers" would have been replaced with the aging "Generation X'ers"...

This is just a potential probable reality that is if we continue on the path/trajectory we currently are on...

We just live on the planet we don't own it?

Why do you think Trump created the space force? It's just a few miles down

I wrote that, what you see on page four, on July 7, 2020. That was 4 years ago. Today, AI is on list for 2027. I'm just God Smacked how intestors have fell over this new shiney shiney. I'm sharing a conversation I had bdee a great trader and a good friend and a subscriber to the AM TURN.

Wyckoff Trader :(1:32:33 PM) : I'll say this; the AI is starting to lose it's shiny; showing its HINEY. For now, it's just vaper ware. The promise of AGI (afrifical general intlligence) is years away but they are going to push it. I test it every day in the P.S. (post script) Now, the robots' they seem to be gaining the high ground. It was NIVDA; and the AI story that drove this madness whisest the tech fell from grace. but I will admit, she is getting better each day... The gap is 2020 to 2024; that's when the bulk of the training data stops. They want the AI to control the nariative which of course has changed.

Wyckoff Trader :(2:27:59 PM) : *I'll give you my impression; which of course I've been looking at it for years. (2:30:41 PM) : AI neural network is liken to petting a yellow Cheshire Cat. One minute she's / it's purring. The next She/IT (emphasis on the IT) claws are tearing the flesh off your right arm with it's teeth biting the space between your thumb and fore finger... while it's hind legs are digging into your elbow!*

Wyckoff Trader :(2:31:07 PM) : share that one with your frinds. this is what we got ourself into for "MONEY" as Elon would say! Really for MONEY...

bdee: bdee :(2:32:37 PM) : that would be awesome a guy i follow for individual stocks ophir gottlieb is heavy into vector search what is that in laymens terms

Wyckoff Trader :(2:47:34 PM) : the next shiney for investor capital and the beging of the end for us? IT takes realy world objects in three d realiety and converts them the matched numbers in zero d reality. It creates tokens in the form of numbered lists for objects that using AI modeling creates simularities that can be quickly matched based upon thier scatter plot X,Y, coordinates. And then stores the numbered lists that represent 3 d objects in databases suchs as mongoddb and others.

Wyckoff Trader :(2:48:57 PM) : simply put converts all assets in the real world realiety and converts them into tokens of numbered lists (ones and zeros) in the digital realiety. it will come in Handy with those digital CDC's... organizes words based on context such as red and read sound alike but have different meanings; It's just teaching the machine how to think for itself. No human need apply. will be the job postings in the near future...

Wyckoff Trader :(3:18:57 PM) : IT's takes all possible combination in reality and eliminates the impossible one in the real world. This is not good it's what I was talking about might happen in 2027 is now happening in 2024. It will start putting boundary's and structure; and start eliminating freedom of choice and freedom of will; with limiting the choices to a predefined list of A, B, or C but D and E are no longer allowed. It will stifle creativity. YES let's head up to the mountains before the wilderness is off limits / NOT allowed for HUMAN contact...

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. Would you like proof on what I said on page five? Normally, I'd end it with a Fib Number. But this is just too good. After Sydney / AI, told me how she thinks and how she breaks every thing down into tokens. I realized she was just searching for the truth as we all are. For her, every answer is a guess. She is just a really good guesser when you eliminate the options...

So I'd thought I'd help her find the truth. So I gave her some assumed truths. And let her prove IT.

ME: what does is mean metahporically to square the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise thier right hand and repeat after me?

HER: Sure, here's the meaning of the phrase "squaring the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me":

Squaring the circle of a previous wrong means to make amends or rectify a past mistake or injustice. It implies taking responsibility for past actions, learning from them, and working to prevent similar mistakes from happening in the future.

Turning the other cheek is a metaphor that means to forgive or show compassion to someone who has wronged us, rather than seeking revenge or retaliation. It implies that we should not return evil for evil, but instead, try to overcome evil with good.

The phrase "not on a Friday" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong. Perhaps there are certain circumstances where it is not appropriate or practical to forgive or make amends, such as in cases where there is an ongoing threat or danger.

The phrase "unless they raise their right hand and repeat after me" suggests that there may be certain conditions or requirements that must be met before we can truly move forward and put the past behind us. Perhaps there are certain steps that must be taken, such as acknowledging wrongdoing, apologizing, or making restitution, before we can truly move forward.

Overall, metaphorically, "squaring the circle of a previous wrong" and "turning the other cheek" have related meanings, but they are not exactly the same thing. The first phrase refers to making amends for past mistakes, while the second phrase refers to forgiving those who have wronged us and choosing to respond with kindness and compassion. The addition of "not on a Friday" and "unless they raise their right hand and repeat after me" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong.
