U.S. Stocks Plunge As Inflation Data Reignites Interest Rate Worries

NEWS / FUNDAMENTALS
(Reuters)

Stocks moved sharply lower in early trading on Wednesday and continued to see significant weakness throughout the session. The major averages all showed notable moves to the downside, with the Dow falling to its lowest closing level in almost two months.

Yesterday's Technical Review using WB's Emini Clock and Wyckoff's Tape Reading Principles

Ok before the numbers this day was an S2L day. Then after the CPI numbers a S2H day. You never know. The last hour Tuesday was smoke and mirrors. The minute after the CPI number Wednesday was smoke and mirrors. Is there ever a bid or offer in the market? Who ever was holding a 5290 one lotter, took on some major heat just a minute away.

One thing I know for sure is that AM HIGH came in right dead on center time 10:30 am maker. And that S1 was in the Algos sights. There is no MID AM we are looking for the lunch low. And that makes it a long day for the bulls.

If you were looking to get short that AM HIGH was the place. And where do you

YES. I have skin in the game. I trade my own personal account. Sardine / Tuna / Billfish trades are for educational purposes only. I am NOT a futures broker and do not manage any accounts. It is my intent to show where trades may occur. What you do is up to you. You can follow my LEVELS / IDEAS to profit or loss. You determine trade size, when, where and how you trade. (CFTC) Futures is not for everyone. IT IS A VOLATILE, COMPLEX AND RISKY BUSINESS. Before you invest, know how much you can afford to lose.

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. That less than \$1.45 each trading day. I'm giving you a 60% discount if you order today. If the pot was any sweeter--you'd be in Colorado a mile high . . . Don't wait. Act today!

Yes, I want to sign up today!

Trading WB's Emini Clock

exit? How about the lunch low? How about 1:10 pm? Next the mid pm high? That would have been a hook about 2:15 pm. Next LAST HOUR LOW. That seals about 3:05 pm early and weak.

In all the madness yesterday, the clock showed the way. I often get lost in the drama and forgot to focus on the light of WB's clock.

I'll admit, the 100 plus drop took my eye off the price. If you just believed in the clock. And if you flipped it, the AM HIGH was perfect. Algos levels. This is that day that you learn from. Get short at the AM HIGH and hold till the lunch low. Remember, there is no MID AM turn so more time to run.

If you just took that one trade you would have nailed a 40 point run. The range of the day.

Wyckoff Trader,

P.S. If you've read this analysis, you might be curious when the best time to

consider a position: (Sydneys / AI Read)

Based on the information provided in the text, a seasoned trader looking to day trade the E-mini futures market might have identified several potential entry and exit points for a short trade.

The trader notes that the AM High came in right on time at 10:30 AM CT, which could have been a potential entry point for a short trade. This level was identified as a maker level and was also in the Algos' sights, suggesting that it could be a significant level of resistance.

The trader also notes that there was no mid-morning turn, indicating that the market may have had more time to run higher before reaching a potential turning point.

The next potential exit point for the short trade could have been the lunch low, which was expected to occur around noon CT. This level was identified as the S1 level, which could have been a potential support level.

feedback@wyckoffamtrader.com

I'm just a regular guy; Not Silver spoon family or WALL Street / Chicago network or Financial Fast Track educational express super star golden boy, I have an intimate knowledge of the insider mindset / how the insiders on Wall Street think act and position their trades.

I wrote my own charting program. I don't use indicators. Just judgment: interaction of Price, Volume and Time. I focus on the Intraday waves of the market and how they are timed to the "hidden clock" of the market. I look at the composite man the "insider" in terms of the market. Others look at bulls and bears (my strongest point)

I SEE THE MARKET IN TERMS OF THE COMPOSITE MAN / INSIDER – Most traders look at the market in terms of bulls and bears. This creates a dichotomy. A duality of the mind. Wyckoff looked at the market in terms of Composite Man / "insiders".

Actionable Trade Plan

I. Market analysis - Neutral: CPI ate my lunch. Ok. If you saw that coming then you were way above average trader! Price is still holding the Weekly S1, if we lose that I'm bearish. 5184 down to 5179.75 Daily S1. Price has lost the R1 and the Daily pivot.

Overnight read - Asian down and European shares down. U.S. Futures: Dow down, S&P 500 down, Nasdaq down. Currently news is late. Most likely, the PPI number got the bulls back control of the soap. At least from 8:48 to 8:52 am.

II. Trade entry - Some may think sell weakness but we are way over sold. Some may think sell strength. If we regain the daily 5255/5199 then 3-Day 5222/5219 R1 then a short on a reversal. If bulls hold, then perhaps a buy some strength on a break out. You may see some 'bag holding' by the composite man and big ol' daddy bull.

III. Trade exit - The numbers today may rock your boat. We've had a day of potential accumulation or re-distribution. Let price show it's hand. Ideal exit on 13, 21, 34, 55 handles from entry. Bulls may look to regain some ground if bears drop the soap.

PROSE and THE NUMBAHS

Last Night: See Actionable
Trade Plan above.

Edge: We either got potential
accumulation with a secondary test
or redistribution.

7/8/9 AM: Backed price off the
Daily Pivot and offered into the
Weekly S1 and Daily S1. Holding
a bid at the 5183 waiting on
numbers.

Today: Need to hold the 5183

handle Bull / Bear Line.

Bulls Want: 97, 07, 15

Bears Want: 76, 64, 56

Globex: 31 handle trading range
on 188 volume.

Cycle Bias: Favored to the bull.

Tone: VIX trading at 16.70

Shape of the day: Normally this
day is rope follows expansion.
Need a surgeons scalpel to trade it.
Perhaps not today.

Honing: Spill down, AM HIGH,
MID AM LOW, lunch high, mid

pm low, LAST HOUR HIGH.

Bill Fish (4H/4D) Bought on
lunch low. LONG

Tuna (30m 1+D) Bought on
lunch low. LONG

Sardine (5M-1D) Got short on
AM HIGH. Exited at the lunch
low. OUT.

Pre Opening: For now, opposite
of yesterday. Sprang yesterdays'
low trying to regain the Pivot.

The clock is used for timing your
entries and exits. Position long at
the lows exit at the highs. Get
short at the highs buy in at the
lows. When the trend is in, WB's
clock is your friend!

Your edge is a series of trades,
not just one trade or one day.

Editorial #YourP&LMatters

how "Hamilton" may be tainted. It's like they are trying to protect the future present from the "Old Negative Karmatic Past"

The question you might ask is what's coming in the future they do not want to know about the Earth's past?

I'd say something else has hijacked the timeline. Never let a good crisis go to waste. You stop the economy. By law forbid business to open. Give them loans they never have to pay back. Let the bigger corporations get the loans. Pay their workers for not working to the tune of \$3,800 per month. Let the governors and the mayors rule their population by imposing fines. And some places force them to wear a mask. And then use "Social Shaming" in college we called it "Hazing" who don't!

While at the same time change their history. I think we did that while O'Jay was being chased by the cops on the freeway when Daddy Bush introduced the "Patiric Act" History never changes it only repeats itself...

And now, they are pushing Trump to decree all U.S. AMERICAN citizens to wear a MASK whilst out in public. If he gives way, the next step is to force all citizens to be vaccinated without their permission. Once, the camel gets its nose in the tent...it won't stop?

I can layout a probable next ten years and then then next twenty years. It's a potential depending upon who wins. Trump or Biden? Now that's strange. Biden has not even been chosen, yet he's already been choose?

The next three years are "Big Data" gathering data for A.I. During these three the 5G towers will be going up. A.I. needs 5G due to latency in the 4G network so they can have human-like thought from the sensors in real-time. By 2025 social morias and styles would have changed. All the negative karmic energy of the past erased. And either Biden or Tump would be ending their term.

In the next two years, A.I. will be analyzing the data from the last five years and making recommendations, suggestions, and then requirements by 2027 on how to be a better human. How to behave and respond to the events around you.

By 2030 not flying cars but flying drones will patrol the sky's delivering goods from Amazon and either had replaced the police or assisting the police.

Petrol fueled automobiles are in museums and off the streets. Self-driving cars are the norm and yes, we have colonies on the moon and perhaps started on mars.

And then 2040 something's coming... And you're not going to like it. But then you and I won't matter. Cause the "Aging Babby Boomers" would have been replaced with the aging "Generation X'ers"...

This is just a potential probable reality that is if we continue on the path/trajectory we currently are on...

We just live on the planet we don't own it?

Why do you think Trump created the space force? It's just a few miles down

I wrote that, what you see on page four, on July 7, 2020. That was 4 years ago. Today, AI is on list for 2027. I'm just God Smacked how intestors have fell over this new shiney shiney. I'm sharing a conversation I had bdee a great trader and a good friend and a subscriber to the AM TURN.

Wyckoff Trader :(1:32:33 PM) : I'll say this; the AI is starting to lose it's shiny; showing its HINEY. For now, it's just vaper ware. The promise of AGI (afrifical general intlligence) is years away but they are going to push it. I test it every day in the P.S. (post script) Now, the robots' they seem to be gaining the high ground. It was NIVDA; and the AI story that drove this madness whisest the tech fell from grace. but I will admit, she is getting better each day... The gap is 2020 to 2024; that's when the bulk of the training data stops. They want the AI to control the nariative which of course has changed.

Wyckoff Trader :(2:27:59 PM) : *I'll give you my impression; which of course I've been looking at it for years. (2:30:41 PM) : AI neural network is liken to petting a yellow Cheshire Cat. One minute she's / it's purring. The next She/IT (emphasis on the IT) claws are tearing the flesh off your right arm with it's teeth biting the space between your thumb and fore finger... while it's hind legs are digging into your elbow!*

Wyckoff Trader :(2:31:07 PM) : share that one with your frinds. this is what we got ourself into for "MONEY" as Elon would say! Really for MONEY...

bdee: bdee :(2:32:37 PM) : that would be awesome a guy i follow for individual stocks ophir gottlieb is heavy into vector search what is that in laymens terms

Wyckoff Trader :(2:47:34 PM) : the next shiney for investor capital and the beging of the end for us? IT takes realy world objects in three d realiety and converts them the matched numbers in zero d reality. It creates tokens in the form of numbered lists for objects that using AI modeling creates simularities that can be quickly matched based upon thier scatter plot X,Y, coordinates. And then stores the numbered lists that represent 3 d objects in databases suchs as mongoddb and others.

Wyckoff Trader :(2:48:57 PM) : simply put converts all assets in the real world realiety and converts them into tokens of numbered lists (ones and zeros) in the digital realiety. it will come in Handy with those digital CDC's... organizes words based on context such as red and read sound alike but have different meanings; It's just teaching the machine how to think for itself. No human need apply. will be the job postings in the near future...

Wyckoff Trader :(3:18:57 PM) : IT's takes all possible combination in reality and eliminates the impossible one in the real world. This is not good it's what I was talking about might happen in 2027 is now happening in 2024. It will start putting boundary's and structure; and start eliminating freedom of choice and freedom of will; with limiting the choices to a predefined list of A, B, or C but D and E are no longer allowed. It will stifle creativity. YES let's head up to the mountains before the wilderness is off limits / NOT allowed for HUMAN contact...

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. That less than \$1.45 each trading day. I'm giving you a 60% discount if you order today. If the pot was any sweeter--you'd be in Colorado a mile high . . . Don't wait. Act today!

Yes, I want to sign up today!

Would you like proof on what I said on page five? Normally, I'd end it with a Fib Number. But this is just too good. After Sydney / AI, told me how she thinks and how she breaks every thing down into tokens. I realized she was just searching for the truth as we all are. For her, every answer is a guess. She is just a really good guesser when you eliminate the options...

So I'd thought I'd help her find the truth. So I gave her some assumed truths. And let her prove IT.

ME: what does it mean metaphorically to square the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me?

HER: Sure, here's the meaning of the phrase "squaring the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me":

Squaring the circle of a previous wrong means to make amends or rectify a past mistake or injustice. It implies taking responsibility for past actions, learning from them, and working to prevent similar mistakes from happening in the future.

Turning the other cheek is a metaphor that means to forgive or show compassion to someone who has wronged us, rather than seeking revenge or retaliation. It implies that we should not return evil for evil, but instead, try to overcome evil with good.

The phrase "not on a Friday" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong. Perhaps there are certain circumstances where it is not appropriate or practical to forgive or make amends, such as in cases where there is an ongoing threat or danger.

The phrase "unless they raise their right hand and repeat after me" suggests that there may be certain conditions or requirements that must be met before we can truly move forward and put the past behind us. Perhaps there are certain steps that must be taken, such as acknowledging wrongdoing, apologizing, or making restitution, before we can truly move forward.

Overall, metaphorically, "squaring the circle of a previous wrong" and "turning the other cheek" have related meanings, but they are not exactly the same thing. The first phrase refers to making amends for past mistakes, while the second phrase refers to forgiving those who have wronged us and choosing to respond with kindness and compassion. The addition of "not on a Friday" and "unless they raise their right hand and repeat after me" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong.

End to End Time: 4.37 s

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. A trader and I were talking about traders. In a perfect world, in a perfect world you be trading with floor traders, brokers and specialists. They would run the stops, get retail to commint and then scalp against it. And then see where value is. Today, you are trading against Algos. They run the stops and scalp 1/1,000 of a second. On a good day you might see the price in 1 second. Personally, I feel you can not beat yourself up. You are not trading against humans. The game is played the same but the players have changed. You can win but not in the millisecond domain.

IMPRO : Wyckoff Trader : (12:40:01 PM) : price is back in that sandbox; not sure what it is?

IMPRO : Wyckoff Trader : (12:52:14 PM) : @Manny how do you define an above average trader? What is your criteria??

IMPRO : Wyckoff Trader : (1:00:07 PM) : your looking for a natural growth progression; 3:2 three steps forward then 2 steps back that 0.667 progression

IMPRO : Wyckoff Trader : (1:00:28 PM) : or an expansion of 1.5

IMPRO : Wyckoff Trader : (1:00:52 PM) : expansion

IMPRO : Wyckoff Trader : (1:02:18 PM) : that an Natural Law of Nature

IMPRO : Wyckoff Trader : (1:04:33 PM) : I would sum it this way. success is not the event of arrival but the progress made on each days' journey

IMPRO : Wyckoff Trader : (1:05:20 PM) : Even Jessie Livermore said the market teaches him a new lesson every day

Manny : Wyckoff Trader : (1:09:48 PM) : thank you. I admire your dedication to be the best. It's inspiring!

Manny : Wyckoff Trader : (1:23:59 PM) : That's tuff question cause they are no longer here. There was one trader that seemed to nail it every time. He was a scalper, said he need to buy food for his dog. He always seemed to have intuition about the next move. I believe he passed away few years after WB.

Manny : Wyckoff Trader : (1:24:16 PM) : TO me above average is having confidence and belief in your approach to trading and the humility to admit when you are wrong and take action to resolve that error. This what Wyckoff had to say about it. This would be my definition on an above Average Trader one who has mastered these emotions. Judgement, self-reliance, courage, prudence, and plliability. To these should be added another quality, patience. In brief ridid self-control is half the battle. I say that because no other trader has your screen or your approach to trading and your time horizon.

Manny : Wyckoff Trader : (1:28:46 PM) : TO summarize an Above average trader is one knows himself. And is able to manage the demons/insecurities of his past.

Manny : Wyckoff Trader : (1:31:14 PM) : but I you needed an yard stick the 0.667 is the best you can get. 0.167 above average or break even. Use that for a P&L or Win to Loss. But you always have to factor in market condiction and your present state on the horizon of life. A case in point would be Jessive Livermore sudden end. That's the challenge to trade against your self and be green at the end of the day. That's all the Zin I got for today...

IMPRO : Wyckoff Trader : (1:47:45 PM) : so Hank is that Italian number old or young?
