U.S. Stocks Finish Lackluster Session Little Changed

NEWS / FUNDAMENTALS
(Reuters)

Stocks turned in a lackluster performance during trading on Wednesday following the strong upward move seen to start the week. After moving to the upside early in the session, the major averages spent the day bouncing back and forth across the unchanged line.

Yesterday's Technical Review using WB's Emini Clock and Wyckoff's Tape Reading Principles

The first 30 minutes were more of a selling wave. That would indicate the spill down. By my eye, they were working about 25,000 ES. The AM HIGH was a hook. Early and weak at 10:10 am. That's telling you something. I don't always listen. Next is the MID AM LOW. You got three choices. Normal, Wedge Zoom, and Link a Stink. The Normal is off the table. Can I have a Wedge Zoom, please?

A little buying comes in at 10:25 am, but it's not really moving the needle. The Wedge Zoom can extend down to the PEON close. Odds are, the Wedge Zoom says the disappointed bull that just dropped the soap. The AM HIGH window is still open, but bulls have abandoned all hope.

YES. I have skin in the game. I trade my own personal account. Sardine / Tuna / Billfish trades are for educational purposes only. I am NOT a futures broker and do not manage any accounts. It is my intent to show where trades may occur. What you do is up to you. You can follow my LEVELS / IDEAS to profit or loss. You determine trade size, when, where and how you trade. (CFTC) Futures is not for everyone. IT IS A VOLATILE, COMPLEX AND RISKY BUSINESS. Before you invest, know how much you can afford to lose.

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. That less than \$1.45 each trading day. I'm giving you a 60% discount if you order today. If the pot was any sweeter--you'd be in Colorado a mile high . . . Don't wait. Act today!

Yes, I want to sign up today!

Trading WB's Emini Clock

Then, at 11:22 am, it looks like Daddy Bull has stepped up to the plate. Then, 20 minutes later, he stops buying and lets it fall back down. So, we seal the AM LOW at 11:22 am, even though the PEONS are pushing for lows. Call that the Preliminary Support. The Selling Climax comes in at 11:44 am. Some more buying comes in at 12:04 pm. That gives us the Automatic Rally.

The Secondary Test is on the sly. A Spring with a test. That's also a Sign of Strength due to the bears' soap drop. This is confirmed quickly as the bulls rally price for the next 70 minutes. Notice how the lunch high seals in 10 minutes just at 1:55 pm.

I got a little suspicious of the Composite Man, if he really wanted to lift price higher, he would have taken out the AM HIGH. He stopped his buying limits just under the spill up. So, 70-minute rally. 10-minute tightening and the mid-pm high seal. Yeah, that's about it.

Next is mid-pm low. You could argue we had a sign of strength, now a last point of support. Price did rally back to the halfway retracement, found a

bid at the mid-pm low 2:55 pm. Next is LAST HOUR HIGH. How high do you want it?

Well, that's not going to happen, cause META is going to disappoint...

Wyckoff Trader,

P.S. If you've read this analysis, you might be curious when the best time to consider a position: (Sydneys / AI Read)

Based on the play-by-play description provided, a seasoned trader might have identified the best time to put a trade on the eMini futures market for a day trade around 11:22 am, when "Daddy Bull" stepped up to the plate, indicating a potential buying opportunity. However, it's important to note that the market can be volatile and unpredictable, so it's crucial to manage risk and not overcommit to a single trade.

Additionally, other potential opportunities for a day trade might have

feedback@wyckoffamtrader.com

I'm just a regular guy; Not Silver spoon family or WALL Street / Chicago network or Financial Fast Track educational express super star golden boy, I have an Intimate knowledge of the insider mindset / how the insiders on Wall Street think act and position their trades.

I wrote my own charting program. I don't use indicators. Just judgment: interaction of Price, Volume and Time. I focus on the Intraday waves of the market and how they are timed to the "hidden clock" of the market. I look at the composite man the "insider" in terms of the market. Others look at bulls and bears (my strongest point)

I SEE THE MARKET IN TERMS OF THE COMPOSITE MAN / INSIDER – Most traders look at the market in terms of bulls and bears. This creates a dichotomy. A duality of the mind. Wyckoff looked at the market in terms of Composite Man / "insiders".

Actionable Trade Plan

I. Market analysis - Bulls were seeing supply at the get to. Price has already opened overbought. That snap back only fueled the fire. Sure after the open it feel even more. Could see a rally. Could see a reasction.

II. Overnight read - Asian down and European shares down. U.S. Futures: Dow down 235, S&P 500 down 37, Nasdaq down 198 points. Investors' major focus on Thursday will be on earnings reports and are likely to keep an eye on first quarter GDP, weekly jobless claims and pending home sales data. Early cues from the U.S. Futures Index suggest that Wall Street might open lower.

III. It's a jump ball today. Let's see where they trade. The 8:30 news got the ball in the bears court.

IV Risk management: Use a risk-reward ratio of at least 1:2, and risk no more than 1% of your account on any single trade. Use a trailing stop loss to lock in profits as the market moves in your favor.

PROSE and THE NUMBAHS

Editorial #YourP&LMatters

how "Hamilton" may be tainted. It's like they are trying to protect the future present from the "Old Negative Karmatic Past"

The question you might ask is what's coming in the future they do not want to know about the Earth's past?

I'd say something else has hijacked the timeline. Never let a good crisis go to waste. You stop the economy. By law forbid business to open. Give them loans they never have to pay back. Let the bigger corporations get the loans. Pay their workers for not working to the tune of \$3,800 per month. Let the governors and the mayors rule their population by imposing fines. And some places force them to wear a mask. And then use "Social Shaming" in college we called it "Hazing" who don't!

While at the same time change their history. I think we did that while O'Jay was being chased by the cops on the freeway when Daddy Bush introduced the "Patiric Act" History never changes it only repeats itself...

And now, they are pushing Trump to decree all U.S. AMERICAN citizens to wear a MASK whilst out in public. If he gives way, the next step is to force all citizens to be vaccinated without their permission. Once, the camel gets its nose in the tent...it won't stop?

I can layout a probable next ten years and then then next twenty years. It's a potential depending upon who wins. Trump or Biden? Now that's strange. Biden has not even been chosen, yet he's already been choose?

The next three years are "Big Data" gathering data for A.I. During these three the 5G towers will be going up. A.I. needs 5G due to latency in the 4G network so they can have human-like thought from the sensors in real-time. By 2025 social morias and styles would have changed. All the negative karmic energy of the past erased. And either Biden or Tump would be ending their term.

In the next two years, A.I. will be analyzing the data from the last five years and making recommendations, suggestions, and then requirements by 2027 on how to be a better human. How to behave and respond to the events around you.

By 2030 not flying cars but flying drones will patrol the sky's delivering goods from Amazon and either had replaced the police or assisting the police.

Petrol fueled automobiles are in museums and off the streets. Self-driving cars are the norm and yes, we have colonies on the moon and perhaps started on mars.

And then 2040 something's coming... And you're not going to like it. But then you and I won't matter. Cause the "Aging Babby Boomers" would have been replaced with the aging "Generation X'ers"...

This is just a potential probable reality that is if we continue on the path/trajectory we currently are on...

We just live on the planet we don't own it?

Why do you think Trump created the space force? It's just a few miles down

I wrote that, what you see on page four, on July 7, 2020. That was 4 years ago. Today, AI is on list for 2027. I'm just God Smacked how intestors have fell over this new shiney shiney. I'm sharing a conversation I had bdee a great trader and a good friend and a subscriber to the AM TURN.

Wyckoff Trader :(1:32:33 PM) : I'll say this; the AI is starting to lose it's shiny; showing its HINEY. For now, it's just vaper ware. The promise of AGI (afrifical general intlligence) is years away but they are going to push it. I test it every day in the P.S. (post script) Now, the robots' they seem to be gaining the high ground. It was NIVDA; and the AI story that drove this madness whisest the tech fell from grace. but I will admit, she is getting better each day... The gap is 2020 to 2024; that's when the bulk of the training data stops. They want the AI to control the nariative which of course has changed.

Wyckoff Trader :(2:27:59 PM) : *I'll give you my impression; which of course I've been looking at it for years. (2:30:41 PM) : AI neural network is liken to petting a yellow Cheshire Cat. One minute she's / it's purring. The next She/IT (emphasis on the IT) claws are tearing the flesh off your right arm with it's teeth biting the space between your thumb and fore finger... while it's hind legs are digging into your elbow!*

Wyckoff Trader :(2:31:07 PM) : share that one with your frinds. this is what we got ourself into for "MONEY" as Elon would say! Really for MONEY...

bdee: bdee :(2:32:37 PM) : that would be awesome a guy i follow for individual stocks ophir gottlieb is heavy into vector search what is that in laymens terms

Wyckoff Trader :(2:47:34 PM) : the next shiney for investor capital and the beging of the end for us? IT takes realy world objects in three d realiety and converts them the matched numbers in zero d reality. It creates tokens in the form of numbered lists for objects that using AI modeling creates simularities that can be quickly matched based upon thier scatter plot X,Y, coordinates. And then stores the numbered lists that represent 3 d objects in databases suchs as mongoddb and others.

Wyckoff Trader :(2:48:57 PM) : simply put converts all assets in the real world realiety and converts them into tokens of numbered lists (ones and zeros) in the digital realiety. it will come in Handy with those digital CDC's... organizes words based on context such as red and read sound alike but have different meanings; It's just teaching the machine how to think for itself. No human need apply. will be the job postings in the near future...

Wyckoff Trader :(3:18:57 PM) : IT's takes all possible combination in reality and eliminates the impossible one in the real world. This is not good it's what I was talking about might happen in 2027 is now happening in 2024. It will start putting boundary's and structure; and start eliminating freedom of choice and freedom of will; with limiting the choices to a predefined list of A, B, or C but D and E are no longer allowed. It will stifle creativity. YES let's head up to the mountains before the wilderness is off limits / NOT allowed for HUMAN contact...

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. That less than \$1.45 each trading day. I'm giving you a 60% discount if you order today. If the pot was any sweeter--you'd be in Colorado a mile high . . . Don't wait. Act today!

Yes, I want to sign up today!

Would you like proof on what I said on page five? Normally, I'd end it with a Fib Number. But this is just too good. After Sydney / AI, told me how she thinks and how she breaks every thing down into tokens. I realized she was just searching for the truth as we all are. For her, every answer is a guess. She is just a really good guesser when you eliminate the options...

So I'd thought I'd help her find the truth. So I gave her some assumed truths. And let her prove IT.

ME: what does it mean metaphorically to square the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me?

HER: Sure, here's the meaning of the phrase "squaring the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me":

Squaring the circle of a previous wrong means to make amends or rectify a past mistake or injustice. It implies taking responsibility for past actions, learning from them, and working to prevent similar mistakes from happening in the future.

Turning the other cheek is a metaphor that means to forgive or show compassion to someone who has wronged us, rather than seeking revenge or retaliation. It implies that we should not return evil for evil, but instead, try to overcome evil with good.

The phrase "not on a Friday" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong. Perhaps there are certain circumstances where it is not appropriate or practical to forgive or make amends, such as in cases where there is an ongoing threat or danger.

The phrase "unless they raise their right hand and repeat after me" suggests that there may be certain conditions or requirements that must be met before we can truly move forward and put the past behind us. Perhaps there are certain steps that must be taken, such as acknowledging wrongdoing, apologizing, or making restitution, before we can truly move forward.

Overall, metaphorically, "squaring the circle of a previous wrong" and "turning the other cheek" have related meanings, but they are not exactly the same thing. The first phrase refers to making amends for past mistakes, while the second phrase refers to forgiving those who have wronged us and choosing to respond with kindness and compassion. The addition of "not on a Friday" and "unless they raise their right hand and repeat after me" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong.

End to End Time: 4.37 s

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. A trader and I were talking about traders. In a perfect world, in a perfect world you be trading with floor traders, brokers and specialists. They would run the stops, get retail to commint and then scalp against it. And then see where value is. Today, you are trading against Algos. They run the stops and scalp 1/1,000 of a second. On a good day you might see the price in 1 second. Personally, I feel you can not beat yourself up. You are not trading against humans. The game is played the same but the players have changed. You can win but not in the millisecond domain.

IMPRO : Wyckoff Trader : (12:40:01 PM) : price is back in that sandbox; not sure what it is?

IMPRO : Wyckoff Trader : (12:52:14 PM) : @Manny how do you define an above average trader? What is your criteria??

IMPRO : Wyckoff Trader : (1:00:07 PM) : your looking for a natural growth progression; 3:2 three steps forward then 2 steps back that 0.667 progression

IMPRO : Wyckoff Trader : (1:00:28 PM) : or an expansion of 1.5

IMPRO : Wyckoff Trader : (1:00:52 PM) : expansion

IMPRO : Wyckoff Trader : (1:02:18 PM) : that an Natural Law of Nature

IMPRO : Wyckoff Trader : (1:04:33 PM) : I would sum it this way. success is not the event of arrival but the progress made on each days' journey

IMPRO : Wyckoff Trader : (1:05:20 PM) : Even Jessie Livermore said the market teaches him a new lesson every day

Manny : Wyckoff Trader : (1:09:48 PM) : thank you. I admire your dedication to be the best. It's inspiring!

Manny : Wyckoff Trader : (1:23:59 PM) : That's tuff question cause they are no longer here. There was one trader that seemed to nail it every time. He was a scalper, said he need to buy food for his dog. He always seemed to have intuition about the next move. I believe he passed away few years after WB.

Manny : Wyckoff Trader : (1:24:16 PM) : TO me above average is having confidence and belief in your approach to trading and the humility to admit when you are wrong and take action to resolve that error. This what Wyckoff had to say about it. This would be my definition on an above Average Trader one who has mastered these emotions. Judgement, self-reliance, courage, prudence, and plliability. To these should be added another quality, patience. In brief ridid self-control is half the battle. I say that because no other trader has your screen or your approach to trading and your time horizon.

Manny : Wyckoff Trader : (1:28:46 PM) : TO summarize an Above average trader is one knows himself. And is able to manage the demons/insecurities of his past.

Manny : Wyckoff Trader : (1:31:14 PM) : but I you needed an yard stick the 0.667 is the best you can get. 0.167 above average or break even. Use that for a P&L or Win to Loss. But you always have to factor in market condiction and your present state on the horizon of life. A case in point would be Jessive Livermore sudden end. That's the challenge to trade against your self and be green at the end of the day. That's all the Zin I got for today...

IMPRO : Wyckoff Trader : (1:47:45 PM) : so Hank is that Italian number old or young?
