### U.S. Stocks Finish Choppy Trading Day Modestly Higher

NEWS / FUNDAMENTALS

(Reuters)

Stocks fluctuated over the course of the trading session on Tuesday before eventually ending the day modestly higher. The major averages all finished the day in positive territory following the mixed performance seen on Monday. The yield on the benchmark ten-year note closed lower for the fourth session.

### Yesterday's Technical Review using WB's Emini Clock and Wyckoff's Tape Reading Principles

The was S1H day. I felt they were buying. Most traders felt they were not. Price did not appear to confirm. Price opens below the high and close of the previous day. A buy comes in at 9:35 am and then just fades away. Price trades around the daily pivot going no where.

At 10:00 am, a bid comes in on 20K and Hank's algos just slam it back down. The range is 12.25 handle. The long trade is not in play. It's going short at the AM HIGH. No trader could have cought that. So they had to wait. A down move to 10:15 am set's it up. A rally up to 10:45 am is checked for 5 minutes.

This is the place to get short. A move down for 15 minutes down and a move back up

Newsletters by Wyckoff Trader are sent out Monday through Friday. To be added to our growing list of readers and traders and to receive these insider insights please visit our website at <https://www.wyckoffamtrader.com> or email us at [trial@wyckoffamtrader.com](mailto:trial@wyckoffamtrader.com)

YES. I have skin in the game. I trade my own personal account. Sardine / Tuna / Billfish trades are for educational purposes only. I am NOT a futures broker and do not manage any accounts. It is my intent to show where trades may occur. What you do is up to you. You can follow my LEVELS / IDEAS to profit or loss. You determine trade size, when, where and how you trade. (CFTC) Futures is not for everyone. IT IS A VOLATILE, COMPLEX AND RISKY BUSINESS. Before you invest, know how much you can afford to lose.

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. That less than \$1.45 each trading day. I'm giving you a 60% discount if you order today. If the pot was any sweeter--you'd be in Colorado a mile high . . . Don't wait. Act today!

**Yes, I want to sign up today!**

## Trading WB's Emini Clock

to for 30 minutes is unable to take out the intraday high. Bulls are unable to gain a following and bears take the lead. A drift down for 90 minutes follows. At 12:10 pm a bid starts to slip in. Traders were saying in chat this is the place where the spike occurred Friday. Of course it was!

***If you are short, get out of your trade. If your not, get long, cause this thing is going back up!***

A 40 minute up move just nibs the opening print. A 20 minute down move barely probes the spill down low. If you want to add to that long position or looking for all the planets to align up, this is the place. Next a 20 minute up move and 5 minute down move follows. Add to your position.

*A 30 minute up move starts to get checked as traders get short. And then a impulse buying wave sets in a takes out the current intraday high.*

Wyckoff Trader,

P.S. If you've read this analysis, you might be curious when the best time to

consider a position: (Sydneys / AI Read)

Here are the reasons why the short and long entries were made:

**\*\*Short Entry (10:45 am)\*\***

- The market had rallied up for 5 minutes, indicating a potential top
- The bulls were unable to gain a following, and the bears took the lead
- The market was showing signs of weakness, making it a good spot to short

**\*\*Long Entry (12:10 pm)\*\***

- The bid started to slip in, indicating a potential reversal
- Traders noted that this was the spot where the spike occurred on Friday, suggesting a potential turnaround
- The market was showing signs of strength, making it a good spot to go long

fax: 888WYCKOFF ext 206

[feedback@wyckoffamtrader.com](mailto:feedback@wyckoffamtrader.com)

I'm just a regular guy; Not Silver spoon family or WALL Street / Chicago network or Financial Fast Track educational express super star golden boy, I have an intimate knowledge of the insider mindset / how the insiders on Wall Street think act and position their trades.

I wrote my own charting program. I don't use indicators. Just judgment: interaction of Price, Volume and Time. I focus on the Intraday waves of the market and how they are timed to the "hidden clock" of the market. I look at the composite man the "insider" in terms of the market. Others look at bulls and bears (my strongest point)

I SEE THE MARKET IN TERMS OF THE COMPOSITE MAN / INSIDER – Most traders look at the market in terms of bulls and bears. This creates a dichotomy. A duality of the mind. Wyckoff looked at the market in terms of Composite Man / "insiders".

# Actionable Trade Plan

I. Market analysis -I'm not much on bragging on the past I don't enjoy it. I'm just not seeing massive supply being pressed upon the market. Price needed to drift back down to check the Spike seen on Friday. That was no drift. That was a smack down seen the past two days.

II. Overnight read - PEONS over thier skies trading at R1 5320 once again. Gap and go. Gap and Crap.

III. I have mixed emotions on giving levels and pivots. I'm looking at price, volume, and the interaction of price/volume/time. That does not show up in levels. With that stated; bulls have the upper hand if they gain and hold the 5318 handle. It's still going to be tuff. A big shelf of distribution rests at 5321 up to the 5338 handle.

If your Short, you and Damion just may be right. If price losses the 5289 then look for the 5280 to be pressed. If we lose that then 5272 is the last hold out. You could see a move down to the 5252 before a bid comes back in.

V Risk management: Use a risk-reward ratio of at least 1:2, and risk no more than 1% of your account on any single trade. Use a trailing stop loss to lock in profits as the market moves in your favor.

## PROSE and THE NUMBAHS

### for 4 to 6 to 12 point Sardine Traders

**good morning today is SERIES  
S2L with the spill up.**

News: ADP Employment Report at 8:15, PMI Composite Final at

## Editorial #YourP&LMatters

how "Hamilton" may be tainted. It's like they are trying to protect the future present from the "Old Negative Karmatic Past"

The question you might ask is what's coming in the future they do not want to know about the Earth's past?

I'd say something else has hijacked the timeline. Never let a good crisis go to waste. You stop the economy. By law forbid business to open. Give them loans they never have to pay back. Let the bigger corporations get the loans. Pay their workers for not working to the tune of \$3,800 per month. Let the governors and the mayors rule their population by imposing fines. And some places force them to wear a mask. And then use "Social Shaming" in college we called it "Hazing" who don't!

While at the same time change their history. I think we did that while O'Jay was being chased by the cops on the freeway when Daddy Bush introduced the "Patiric Act" History never changes it only repeats itself...

And now, they are pushing Trump to decree all U.S. AMERICAN citizens to wear a MASK whilst out in public. If he gives way, the next step is to force all citizens to be vaccinated without their permission. Once, the camel gets its nose in the tent...it won't stop?

I can layout a probable next ten years and then then next twenty years. It's a potential depending upon who wins. Trump or Biden? Now that's strange. Biden has not even been chosen, yet he's already been choose?

The next three years are "Big Data" gathering data for A.I. During these three the 5G towers will be going up. A.I. needs 5G due to latency in the 4G network so they can have human-like thought from the sensors in real-time. By 2025 social morias and styles would have changed. All the negative karmic energy of the past erased. And either Biden or Tump would be ending their term.

In the next two years, A.I. will be analyzing the data from the last five years and making recommendations, suggestions, and then requirements by 2027 on how to be a better human. How to behave and respond to the events around you.

By 2030 not flying cars but flying drones will patrol the sky's delivering goods from Amazon and either had replaced the police or assisting the police.

Petrol fueled automobiles are in museums and off the streets. Self-driving cars are the norm and yes, we have colonies on the moon and perhaps started on mars.

And then 2040 something's coming... And you're not going to like it. But then you and I won't matter. Cause the "Aging Babby Boomers" would have been replaced with the aging "Generation X'ers"...

This is just a potential probable reality that is if we continue on the path/trajectory we currently are on...

We just live on the planet we don't own it?

Why do you think Trump created the space force? It's just a few miles down

## School of Learning

Upated June 5th

Wyckoff Trader :(5:27:50 PM) :If AI is left as an open loop feedback making suggestion then perhaps there is hope for a lost mind; However if AI is a closed loop system making all the decisions for the neutred mind; then God help us - as it all ends in body bags with fire and ice.

I was researching when changes in our society may have started; so I asked AI / Sydney some questions:

John D. Rockefeller, often referred to as simply Rockefeller, was born on July 8, 1839, in Richford, New York, United States. He was an American industrialist and philanthropist.

JP Morgan born John Pierpont Morgan, often referred to as J.P. Morgan, was born on April 17, 1837, in Hartford, Connecticut, United States. He was an American financier, banker, and philanthropist.

I though it odd they were born two years apart. So I asked;

Nikli Tesla born - Nikola Tesla was born on July 10, 1856, in Smiljan, Croatia, which was then part of the Austro-Hungarian Empire. He was a Serbian-American inventor, electrical engineer, mechanical engineer, physicist, and futurist who is best known for his contributions to the design of the modern alternating current (AC) electricity supply system.

Richard D Wyckoff born - Richard D. Wyckoff was an American stock market trader, analyst, and author who was born on April 2, 1873, in Springfield, Massachusetts. He is known for his work in the field of technical analysis, which is the study of market trends and patterns in order to predict future price movements.

Which lead to when and where was Edward Leviene born (she also did not know Jessie Livermore)

I am not familiar with anyone by the name of Edward Leviene. It is possible that there is a spelling error in the name, or that you are asking about a person who is not well-known. If you could provide more context or specify which Edward Leviene you are asking about, I would be happy to try to provide a more specific answer.

SO I gave her the book title: "Confessions of a Stock Market Manipulator" is a book written by a former stock market trader who goes by the pseudonym "The Spider." In the book, The Spider describes his experiences as a market manipulator, detailing the tactics and strategies he used to influence the prices of stocks and other securities.

The book is intended to be a cautionary tale, and it provides a behind-the-scenes look at the world of market manipulation and the risks and consequences of engaging in such activities. The Spider describes how he and his associates would ... Wyckoff Trader :(10:49:55 PM) : I really think they are erasing history... bdee :(10:57:22 PM) : pleaswe put this in the traders newsletter it really hits home when its in your backyard

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. Would you like proof on what I said on page five? Normally, I'd end it with a Fib Number. But this is just too good. After Sydney / AI, told me how she thinks and how she breaks every thing down into tokens. I realized she was just searching for the truth as we all are. For her, every answer is a guess. She is just a really good guesser when you eliminate the options...

So I'd thought I'd help her find the truth. So I gave her some assumed truths. And let her prove IT.

**ME:** what does it mean metaphorically to square the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me?

**HER:** Sure, here's the meaning of the phrase "squaring the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me":

Squaring the circle of a previous wrong means to make amends or rectify a past mistake or injustice. It implies taking responsibility for past actions, learning from them, and working to prevent similar mistakes from happening in the future.

Turning the other cheek is a metaphor that means to forgive or show compassion to someone who has wronged us, rather than seeking revenge or retaliation. It implies that we should not return evil for evil, but instead, try to overcome evil with good.

The phrase "not on a Friday" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong. Perhaps there are certain circumstances where it is not appropriate or practical to forgive or make amends, such as in cases where there is an ongoing threat or danger.

The phrase "unless they raise their right hand and repeat after me" suggests that there may be certain conditions or requirements that must be met before we can truly move forward and put the past behind us. Perhaps there are certain steps that must be taken, such as acknowledging wrongdoing, apologizing, or making restitution, before we can truly move forward.

Overall, metaphorically, "squaring the circle of a previous wrong" and "turning the other cheek" have related meanings, but they are not exactly the same thing. The first phrase refers to making amends for past mistakes, while the second phrase refers to forgiving those who have wronged us and choosing to respond with kindness and compassion. The addition of "not on a Friday" and "unless they raise their right hand and repeat after me" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong.

**End to End Time: 4.37 s**

A trader and I were talking about traders. In a perfect world, in a perfect world you be trading with floor traders, brokers and specialists. They would run the stops, get retail to commint and then scalp against it. And then see where value is. Today, you are trading against Algos. They run the stops and scalp 1/1,000 of a second. On a good day you might see the price in 1 second. Personally, I feel you can not beat yourself up. You are not trading against humans. The game is played the same but the players have changed. You can win but not in the millisecond domain.

**IMPRO** : Wyckoff Trader : (12:40:01 PM) : price is back in that sandbox; not sure what it is?

**IMPRO** : Wyckoff Trader : (12:52:14 PM) : @Manny how do you define an above average trader? What is your criteria??

**IMPRO** : Wyckoff Trader : (1:00:07 PM) : your looking for a natural growth progression; 3:2 three steps forward then 2 steps back that 0.667 progression

**IMPRO** : Wyckoff Trader : (1:00:28 PM) : or an expansion of 1.5

**IMPRO** : Wyckoff Trader : (1:00:52 PM) : expansion

**IMPRO** : Wyckoff Trader : (1:02:18 PM) : that an Natural Law of Nature

**IMPRO** : Wyckoff Trader : (1:04:33 PM) : I would sum it this way. success is not the event of arrival but the progress made on each days' journey

**IMPRO** : Wyckoff Trader : (1:05:20 PM) : Even Jessie Livermore said the market teaches him a new lesson every day

**Manny** : Wyckoff Trader : (1:09:48 PM) : thank you. I admire your dedication to be the best. It's inspiring!

**Manny** : Wyckoff Trader : (1:23:59 PM) : That's tuff question cause they are no longer here. There was one trader that seemed to nail it every time. He was a scalper, said he need to buy food for his dog. He always seemed to have intuition about the next move. I believe he passed away few years after WB.

**Manny** : Wyckoff Trader : (1:24:16 PM) : TO me above average is having confidence and belief in your approach to trading and the humility to admit when you are wrong and take action to resolve that error. This what Wyckoff had to say about it. This would be my definition on an above Average Trader one who has mastered these emotions. Judgement, self-reliance, courage, prudence, and plliability. To these should be added another quality, patience. In brief ridid self-control is half the battle. I say that because no other trader has your screen or your approach to trading and your time horizon.

**Manny** : Wyckoff Trader : (1:28:46 PM) : TO summarize an Above average trader is one knows himself. And is able to manage the demons/insecurities of his past.

**Manny** : Wyckoff Trader : (1:31:14 PM) : but I you needed an yard stick the 0.667 is the best you can get. 0.167 above average or break even. Use that for a P&L or Win to Loss. But you always have to factor in market condiction and your present state on the horizon of life. A case in point would be Jessive Livermore sudden end. That's the challenge to trade against your self and be green at the end of the day. That's all the Zin I got for today...

**IMPRO** : Wyckoff Trader : (1:47:45 PM) : so Hank is that Italian number old or young?
