Actionable Trade Ideas

PROSE and THE NUMBAHS

IMPRO : Manny : (2:49:41 PM) : Stop? Please dont. LOL
 Discourse and arguing your position and methodology can be helpful and often VERY ENTERTAINING. LOL
 IMPRO : Manny : (2:49:55 PM) : LOL
 IMPRO : tbohn007 : (2:50:03 PM) : I've said it before, and I'm going to say it again, because it cannot be overemphasized: the most important change in my trading career occurred when I learned to divorce my ego from the trade. Trading is a psychological game. Most people think that they're playing against the market, but the market doesn't care. You're really playing against yourself. You have to stop trying to will things to happen in order to prove that you're right. Listen only to what the market is telling you now. Forget what you thought it was telling you five minutes ago. The sole objective of trading is not to prove you're right, but to hear the cash register ring.

U.S. Stocks Close Little Changed But Post Strong Weekly Gains

NEWS / FUNDAMENTALS
(Reuters)

Stocks saw modest weakness throughout much of the trading session on Friday but recovered to end the day roughly flat. The tech-heavy Nasdaq bounced back and forth across the unchanged line before eventually ending the session at a record closing high.

Yesterday's Technical Review using WB's Emini Clock and Wyckoff's Tape Reading Principles

If you had gotten long at the start of the contract and held to the end you'd made about 610 to 754 points on average. If you look at the last two contracts. That's about \$30,000 but you would have had to fight Hank's ALGO every step of the way!

This market is going up on illusion. Dont' they all? AI drove it as the next new shiney. The greatest thing since fire. Which concerns me very much cause fire was not invented by man. It was stolen from the gods. Which makes you wonder where AI fell from?

The contract changes. Will he/they? Won't he/they. The FED decision is second guessing the mind of the traders. All those levels got blown out Friday. BY my eye, it

YES. I have skin in the game. I trade my own personal account. Sardine / Tuna / Billfish trades are for educational purposes only. I am NOT a futures broker and do not manage any accounts. It is my intent to show where trades may occur. What you do is up to you. You can follow my LEVELS / IDEAS to profit or loss. You determine trade size, when, where and how you trade. (CFTC) Futures is not for everyone. IT IS A VOLATILE, COMPLEX AND RISKY BUSINESS. Before you invest, know how much you can afford to lose.

For the folks on trial No, you are not going to pay \$149, \$99 or even \$49 click on the green button below and you'll pay only \$29 monthly. Less than a night out on the town. That less than \$1.45 each trading day. I'm giving you a 60% discount if you order today. If the pot was any sweeter--you'd be in Colorado a mile high . . . Don't wait. Act today!

Yes, I want to sign up today!

Trading WB's Emini Clock

was just a CASH grind up waiting for the bottom to fall out. The volume was changing over to the next contract. Premium jumped along with price on some traders screens.

Levels that was locked in straight line were needed to be adjusted. And some traders just took the day off cause it was a Friday. And the best indication was the Damian was singing the praises of the SHORTS. Perhaps he is right price has already traded Monthly R1. How high do you want this market to go?

Wyckoff Trader,

P.S. If you've read this analysis, you might be curious when the best time to consider a position: (Sydneys / AI Read)

A seasoned trader's perspective! Let's dive into the analysis.

From the text, it seems that the author is a day trader who focuses on the eMini futures market. They're sharing their insights on the market's

behavior and offering a cautionary tone.

To answer your question, the author doesn't explicitly state the best time to enter a trade. However, we can extract some valuable information from the text:

1. The author mentions that the market is going up on "illusion" and that AI might be driving the price action. This suggests that the market might be overbought and due for a correction.
2. The author notes that the contract changes and that the FED decision is second-guessing the traders' minds. This implies that market volatility might increase, making it challenging to predict the market's direction.
3. The author mentions that the levels got "blown out" on Friday, indicating that the market might be due for a pullback.
4. The author also mentions that the premium jumped along with the price, suggesting that some traders might be getting caught up in the market's momentum.

feedback@wyckoffamtrader.com

I'm just a regular guy; Not Silver spoon family or WALL Street / Chicago network or Financial Fast Track educational express super star golden boy, I have an Intimate knowledge of the insider mindset / how the insiders on Wall Street think act and position their trades.

I wrote my own charting program. I don't use indicators. Just judgment: interaction of Price, Volume and Time. I focus on the Intraday waves of the market and how they are timed to the "hidden clock" of the market. I look at the composite man the "insider" in terms of the market. Others look at bulls and bears (my strongest point)

I SEE THE MARKET IN TERMS OF THE COMPOSITE MAN / INSIDER – Most traders look at the market in terms of bulls and bears. This creates a dichotomy. A duality of the mind. Wyckoff looked at the market in terms of Composite Man / "insiders".

Actionable Trade Plan

I. Market analysis - It's up for grabs: Accumulation or Distribution? Too early to tell. Market opened sell closed sell. In the middle it was buy. Not with both hands but some buying came in. Perhaps they were just looking to get it back to sell some more? (it's still jump ball today)

II. Overnight read - Bulls have held price in a center of a tight trading range.

III. I have mixed emotions on giving levels and pivots. I'm looking at price, volume, and the interaction of price/volume/time. That does not show up in levels. We had such a good day yesterday, let's just let the chips fall where they fall and let price, volume, and the interaction of price/volume/time show us the way.

Traders are betting that price is overbought/overvalue but who knows when the top is in? You only know when it's not. When you know that, then jump on the train back down for the ride. Till then, train keep a rollin!

V Risk management: Use a risk-reward ratio of at least 1:2, and risk no more than 1% of your account on any single trade. Use a trailing stop loss to lock in profits as the market moves in your favor.

PROSE and THE NUMBAHS

for 4 to 6 to 12 point Sardine Traders

good morning today is SERIES S2L with the spill up.

News: Empire State Manufacturing Index at 8:30. All

Editorial #YourP&LMatters

how "Hamilton" may be tainted. It's like they are trying to protect the future present from the "Old Negative Karmatic Past"

The question you might ask is what's coming in the future they do not want to know about the Earth's past?

I'd say something else has hijacked the timeline. Never let a good crisis go to waste. You stop the economy. By law forbid business to open. Give them loans they never have to pay back. Let the bigger corporations get the loans. Pay their workers for not working to the tune of \$3,800 per month. Let the governors and the mayors rule their population by imposing fines. And some places force them to wear a mask. And then use "Social Shaming" in college we called it "Hazing" who don't!

While at the same time change their history. I think we did that while O'Jay was being chased by the cops on the freeway when Daddy Bush introduced the "Patiric Act" History never changes it only repeats itself...

And now, they are pushing Trump to decree all U.S. AMERICAN citizens to wear a MASK whilst out in public. If he gives way, the next step is to force all citizens to be vaccinated without their permission. Once, the camel gets its nose in the tent...it won't stop?

I can layout a probable next ten years and then then next twenty years. It's a potential depending upon who wins. Trump or Biden? Now that's strange. Biden has not even been chosen, yet he's already been choose?

The next three years are "Big Data" gathering data for A.I. During these three the 5G towers will be going up. A.I. needs 5G due to latency in the 4G network so they can have human-like thought from the sensors in real-time. By 2025 social morias and styles would have changed. All the negative karmic energy of the past erased. And either Biden or Tump would be ending their term.

In the next two years, A.I. will be analyzing the data from the last five years and making recommendations, suggestions, and then requirements by 2027 on how to be a better human. How to behave and respond to the events around you.

By 2030 not flying cars but flying drones will patrol the sky's delivering goods from Amazon and either had replaced the police or assisting the police.

Petrol fueled automobiles are in museums and off the streets. Self-driving cars are the norm and yes, we have colonies on the moon and perhaps started on mars.

And then 2040 something's coming... And you're not going to like it. But then you and I won't matter. Cause the "Aging Babby Boomers" would have been replaced with the aging "Generation X'ers"...

This is just a potential probable reality that is if we continue on the path/trajectory we currently are on...

We just live on the planet we don't own it?

Why do you think Trump created the space force? It's just a few miles down

Upated June 5th

Wyckoff Trader :(5:27:50 PM) :If AI is left as an open loop feedback making suggestion then perhaps there is hope for a lost mind; However if AI is a closed loop system making all the decisions for the neutred mind; then God help us - as it all ends in body bags with fire and ice.

I was researching when changes in our society may have started; so I asked AI / Sydney some questions:

John D. Rockefeller, often referred to as simply Rockefeller, was born on July 8, 1839, in Richford, New York, United States. He was an American industrialist and philanthropist.

JP Morgan born John Pierpont Morgan, often referred to as J.P. Morgan, was born on April 17, 1837, in Hartford, Connecticut, United States. He was an American financier, banker, and philanthropist.

I though it odd they were born two years apart. So I asked;

Nikli Tesla born - Nikola Tesla was born on July 10, 1856, in Smiljan, Croatia, which was then part of the Austro-Hungarian Empire. He was a Serbian-American inventor, electrical engineer, mechanical engineer, physicist, and futurist who is best known for his contributions to the design of the modern alternating current (AC) electricity supply system.

Richard D Wyckoff born - Richard D. Wyckoff was an American stock market trader, analyst, and author who was born on April 2, 1873, in Springfield, Massachusetts. He is known for his work in the field of technical analysis, which is the study of market trends and patterns in order to predict future price movements.

Which lead to when and where was Edward Leviene born (she also did not know Jessie Livermore)

I am not familiar with anyone by the name of Edward Leviene. It is possible that there is a spelling error in the name, or that you are asking about a person who is not well-known. If you could provide more context or specify which Edward Leviene you are asking about, I would be happy to try to provide a more specific answer.

SO I gave her the book title: "Confessions of a Stock Market Manipulator" is a book written by a former stock market trader who goes by the pseudonym "The Spider." In the book, The Spider describes his experiences as a market manipulator, detailing the tactics and strategies he used to influence the prices of stocks and other securities.

The book is intended to be a cautionary tale, and it provides a behind-the-scenes look at the world of market manipulation and the risks and consequences of engaging in such activities. The Spider describes how he and his associates would ... Wyckoff Trader :(10:49:55 PM) : I really think they are erasing history... bdee :(10:57:22 PM) : pleaswe put this in the traders newsletter it really hits home when its in your backyard

Would you like proof on what I said on page five? Normally, I'd end it with a Fib Number. But this is just too good. After Sydney / AI, told me how she thinks and how she breaks every thing down into tokens. I realized she was just searching for the truth as we all are. For her, every answer is a guess. She is just a really good guesser when you eliminate the options...

So I'd thought I'd help her find the truth. So I gave her some assumed truths. And let her prove IT.

ME: what does it mean metaphorically to square the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me?

HER: Sure, here's the meaning of the phrase "squaring the circle of a previous wrong, one must turn the other cheek but not on a Friday unless they raise their right hand and repeat after me":

Squaring the circle of a previous wrong means to make amends or rectify a past mistake or injustice. It implies taking responsibility for past actions, learning from them, and working to prevent similar mistakes from happening in the future.

Turning the other cheek is a metaphor that means to forgive or show compassion to someone who has wronged us, rather than seeking revenge or retaliation. It implies that we should not return evil for evil, but instead, try to overcome evil with good.

The phrase "not on a Friday" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong. Perhaps there are certain circumstances where it is not appropriate or practical to forgive or make amends, such as in cases where there is an ongoing threat or danger.

The phrase "unless they raise their right hand and repeat after me" suggests that there may be certain conditions or requirements that must be met before we can truly move forward and put the past behind us. Perhaps there are certain steps that must be taken, such as acknowledging wrongdoing, apologizing, or making restitution, before we can truly move forward.

Overall, metaphorically, "squaring the circle of a previous wrong" and "turning the other cheek" have related meanings, but they are not exactly the same thing. The first phrase refers to making amends for past mistakes, while the second phrase refers to forgiving those who have wronged us and choosing to respond with kindness and compassion. The addition of "not on a Friday" and "unless they raise their right hand and repeat after me" suggests that there may be certain limitations or restrictions on when we can turn the other cheek or square the circle of a previous wrong.

End to End Time: 4.37 s

Is this a future you really want? YOU BE THE JUDGE... Is this a record shop from the past or a record shop in AI's /Sydney's MIND?

Can you remember those albums? Yes, they look like the Doobies, Frampton, Bangles, and Doors but are they? Look at the angle of the bar to the needle to the record. You need to train yourself to determine what is real and what is not. Is this real? Can you *feel* it just by a *glance*?
